- Cybersecurity and Trust in Interoperable Ecosystems

13th i-ESA

International Conference on Interoperability for Enterprise Systems and Applications

I-ESA'26 will offer an outstanding opportunity to industries to exchange experience and problems on business interoperability in their daily operations. I-ESA brings together the world's leading researchers and practitioners in the area of enterprise interoperability, and it is a unique forum for the exchange of visions, ideas, research results and industrial experiences, dealing with a wealth of interoperability research subjects.
